EXPERIENCE

Software Developer

Lazy Idli Pvt. Ltd.

Sep 2025 – Present

Bangalore, India

- Developed a streaming AI document editor for QuikESG using OpenAI APIs and transformed Markdown outputs into Lexical nodes for real-time AI-assisted editing, cutting cached round-trip latency by 4 sec per request
- Engineered a Retrieval-Augmented Generation (RAG) pipeline using OpenAI embeddings and pgvector, with optimized chunking and prompt injection achieving 80% similarity to human-authored ESG documents
- Cut infrastructure costs 98% \$300 to \$5/mo by migrating to AWS S3 with CloudFront CDN, eliminating EC2 egress costs improving asset delivery performance and achieved measurable latency reduction
- Owned production infrastructure on AWS EC2 with Nginx reverse proxy, automated SSL via Certbot, IP-restricted PostgreSQL access, and Cloudflare CDN maintaining 99.9% uptime SLA
- Delivered QR-based workflow tracking for TCIL implementing stage-wise logging to generate bottleneck datasets, enabling data-driven processing time optimization across the refurbishment pipeline
- Architected REST APIs owned client-facing product demos, authored PRDs, managed feature roadmap, and tracked issues
- Designed real-time multi-channel messaging infrastructure using Ably Chat, enabling presence detection and channel-based communication with approximately 100ms message latency end to end

Full Stack Developer Intern

Lazy Idli .Pvt.Ltd

Jul 2025 – Aug 2025

Bangalore, India

- Shipped responsive web and mobile UIs from Figma designs in React delivering scalable components now serving 150+ active users, with collaborative GitHub workflows and sub-200ms render performance
- Scaled Python and Express backend features and API integrations, managing schema migrations via Alembic and debugging production issues to ensure high availability across SaaS workflows

PROJECTS

Teho-X | FastAPI, React Native, React, Razorpay, MongoDB, Android Expo

Mar 2026 – Present

- Built dual React Native apps and a web platform for a 10-game tournament system engineering a score and points-ranking engine mapping player performance to tiered rewards across formats
- Integrated Razorpay payment gateway with discount logic, ticket purchasing flow, and live leaderboard display platform serving 2,000 to 3,000 participants per tournament at pre-launch stage

QuikESG – AI Document Editor | OpenAI, FastAPI, React, PostgreSQL, Pgvector, Lexical

Dec 2025 – Feb 2026

- OpenAI enabled ESG editor reducing time-to-first-visible-token to <1 sec to enable, AI-assisted document editing
- Orchestrated a multi-source RAG pipeline, parsing 5+ context files, embedding documents into a pgvector index.

ChatApp Forge | FastAPI, Ably, Redis, Node.js, React, TypeScript, Tailwind, Redis, MongoDB

Jul 2025 – Nov 2025

- Calendar booking engine, RBAC backed by Redis caching layer reducing latency by 800ms serving 150+ active users
- Real-time chat microservice with sub-100ms Ably messaging and presence tracking supporting event driven notifications

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL

Frameworks: React, Node.js, Express, FastAPI, React Native, Android Studio

AI/ML: OpenAI API, Claude Code, Antigravity, RAG, Media-pipe, NumPy, LangChain, Vector embeddings

Databases/ORMs: PostgreSQL, MySQL, MongoDB, pgvector, Redis, Alembic

Cloud/Infra: AWS (EC2, S3), Google Cloud Platform, Docker, Google OAuth, JWT, Linux, Nginx CloudFlare

Realtime: WebSocket, Socket.IO, Ably Chat SDK

EDUCATION

Presidency University

BTECH – Electronics and Communication Engineering – CGPA – 7.95/10

Bangalore, India

Dec 2021 – May 2025

Base PU College

PCMC – 77%

Bangalore, India

Apr 2019 – Jul 2021
